ABOUT ME

A highly motivated, self-teaching developer with a deep interest in JavaScript. I specialize in responsive design with HTML5, CSS3, JavaScript, React, Firebase, node.js, express.js, MongoDB.

PROGRAMMING SKILLS & LANGUAGE PROFICIENCY

Frontend: HTML5, CSS3, JavaScript (ES-6), React js, React Router, Bootstrap4, Material UI, Firebase.

Backend: Node JS, Express JS, MongoDB.

Familiar with: Typescript, React Native, TailwindCSS, JWT, Stripe.

Development Tools: VS Code, Firebase, Node, Npm, Git, Github, Netlify, Heroku, Figma, Dev tools.

Language Proficiency: English (Conversational), Bangla (Native).

PROJECTS

01. Bikers World: Full-stack

[\(Live Site\)](#) | [Github Frontend](#) | [Github Backend](#)

- A niche website for selling motorbikes.
- Authenticated users can place order and see order related options on dashboard
- An admin can manage orders, products and add another admin from dashboard.

Technology: React JS, Bootstrap, Material UI, React-router-dom, Context-api, Custom hooks, Firebase, Node JS, Express JS, MongoDB.

02. Traveler: Full-stack

[\(Live Site\)](#) | [Github Frontend](#) | [Github Backend](#)

- A tourism related website for a travel agency.
- Authenticated users will be able to book and manage their selected bookings.
- An admin can see all bookings data, change the booking status and add new services.

Technology: React JS, Bootstrap, React-router-dom, Context-api, Custom hooks, Firebase, Axios, Node JS, Express JS, MongoDB.

03. Dental Care: Frontend Only

[\(Live Site\)](#) | [Github](#)

- A dental service-related website for a dental clinic.
- Authenticated users can see service details by clicking on a single service.
- Users can log in or register with Email, Google and Facebook.

Technology: React JS, Bootstrap, React-router-dom, Context-api, Custom hooks, Firebase.
